## Snacks

- Potato Chips:
- Sales volumes grew after price revisions in September on larger Hokkaido potato harvest and firm demand
- Strong sales of renewed Kataage Potato on its 30th anniversary and large size products during high-demand year end season
■ Jagarico:
- Strong sales of regular products on all channels; increased number of limited-time products also contributed
- Products with new value and other snacks:
- Sales of gift snack items such as Jaga-Pokkuru rose significantly on increased domestic travel due to nationwide programs to support travel and recovery in inbound demand due to the relaxation of border policies
- As price revisions were not implemented for corn-based snacks in the fall, demand shifted here from other products and sales rose

## Cereals

- Sales fell despite TV commercials, an increased volume campaign, etc., as price revisions caused market-wide weakening of demand
- Aim to recover by adding functionality to the original Frugra, etc.
